

Gullius

character dialogue

Biography:

Gullius is a two year-old seagull fledgeling who originates from the North-East of England. A bold youngster with a strong sense of adventure, he's very confident and secure in himself for such a new bird. His strong relationships with his parents mean he cares more than the average gull about family and flock. That said, he often dives into situations head first without always considering the consequences. He has a dry sense of humour and a quick wit, which is reflected in his snappy comebacks and one-liners. He's a brave, tenacious and natural leader who isn't afraid to direct other gulls in a crisis situation. He has a noticeable, friendly North-East accent but not one that's too strong for the general public to understand. He uses some colloquialisms and local phrases that the player will come to understand through gameplay..

Casting choices:

The accents of the North-East are frequently rated as being the UK's friendliest. However they can be quite strong for non-locals to grasp and there's variations within the regional dialects. Some example casting voices could be young men from Teesside, County Durham or Middlesbrough. One example would be to look at Jamie Bell in Billy Elliot (2000) for an idea of an ideal voice/attitude.
